

PART C: DATA REQUEST**Client: STADIOEquities****TABLE 1: CUSTOMER ACCOUNT AND ONBOARDING DATA**

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Unique anonymised identifier; consistent across all datasets.
Registration Date	Date	2025-03-15	Date the customer registered; YYYY-MM-DD.
Account Status	Categorical	Active	Examples: Active, Inactive, Closed, Suspended.
KYC Status	Categorical	Complete	Examples: Not Started, In Progress, Complete, Failed.
KYC Completion Date	Date	2025-03-18	Date KYC was completed; blank if not completed.
Onboarding Completion	Boolean	True	Indicates whether onboarding was completed.
Abandoned Step	Categorical	Risk Profile	Onboarding stage where the customer stopped, if applicable.
Onboarding Duration	Numeric	14.5	Time taken to complete onboarding, preferably minutes.
First Deposit Date	Date	2025-03-20	Date of first successful deposit; blank if never deposited.

Days to First Deposit	Integer	5	Days between registration and first successful deposit.
Account Type	Categorical	Individual	Use account categories captured by STADIOEquities.

TABLE 2: ACCOUNT FUNDING AND BALANCE DATA

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Must match Customer ID in other datasets.
Deposit Date	DateTime	2025-03-20 14:32:10	Date and time of each successful deposit.
Deposit Amount	Numeric	2500.00	Monetary value; specify currency and unit.
Deposit Count	Integer	4	Number of deposits during the relevant period.
Withdrawal Date	DateTime	2025-06-15 10:20:00	Date and time of withdrawal.
Withdrawal Amount	Numeric	500.00	Monetary value of withdrawal.
Withdrawal Count	Integer	2	Number of withdrawals during the relevant period.
Account Balance	Numeric	6200.00	Balance at the observation date.
Average Balance	Numeric	5800.00	Average balance over the selected period.
Balance Change	Numeric	-750.00	Change in balance over the selected period.

Funding Frequency	Integer	3	Number of successful funding events during the period.
-------------------	---------	---	--

TABLE 3: APP AND WEB BEHAVIOUR DATA

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Unique anonymised customer identifier.
Session Date	DateTime	2025-04-12 09:45:21	Date and time of app/web session.
Session Count	Integer	18	Number of app/web sessions during the relevant period.
Session Duration	Numeric	8.5	Average session duration in minutes.
Screens Viewed	Integer	12	Number of screens viewed.
Feature Usage	Categorical/String	Portfolio	Features used by the customer.
Login Frequency	Integer	6	Number of logins during the relevant period.
Days Since Last Login	Integer	14	Days since most recent login.
Onboarding Sessions	Integer	3	Number of onboarding sessions.
Abandonment Count	Integer	2	Number of relevant digital/onboarding abandonments.
Device Type	Categorical	Mobile	Examples: Mobile, Tablet, Desktop/Web.

TABLE 4: TRADING ACTIVITY DATA

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Must match customer identifier across datasets.
Trade Date	DateTime	2025-04-15 11:23:45	Date and time of each trade.
Trade Count	Integer	15	Number of trades during the relevant period.
Trade Value	Numeric	12500.00	Total monetary value of trade(s).
Trade Type	Categorical	Buy	Examples: Buy, Sell.
Instrument Type	Categorical	ETF	Category of investment instrument.
Instruments Held	Integer	5	Number of different instruments held.
Portfolio Value	Numeric	18500.00	Portfolio value at observation date.
Trading Frequency	Numeric	2.5	Average trades per selected period.
Days Since Last Trade	Integer	21	Days since most recent trade.
Concentration Measure	Numeric	0.72	Portfolio concentration measure, where available.
Active Holding	Boolean	True	Indicates whether the customer currently holds investments.

TABLE 5: PRODUCT AND SUBSCRIPTION DATA

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Unique anonymised identifier.
Premium Status	Categorical	Active	Examples: Active, Cancelled, Never Subscribed.
Premium Start Date	Date	2025-05-01	Date premium subscription began.
Premium Cancellation Date	Date	2025-08-01	Date subscription was cancelled, if applicable.
Product Count	Integer	3	Number of products currently used.
Product Type	Categorical/String	Premium	Product or service used by customer.
Product Take-up	Boolean	True	Indicates adoption of a relevant product.
Cancellation Count	Integer	1	Number of product cancellations.

TABLE 6: CUSTOMER DEMOGRAPHIC AND PROFILE DATA

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Unique anonymised identifier.
Age Band	Categorical	25–34	Use age bands rather than exact date of birth where possible.
Region	Categorical	Gauteng	Use standard geographic categories.

Stated Goal	Categorical	Long-term investing	Use categories captured at registration.
Risk Appetite	Categorical	Moderate	Use the stated risk category at sign-up.
Investor Type	Categorical	Monthly Saver	Use existing investor classifications where available.

TABLE 7: CUSTOMER SUPPORT AND FEEDBACK DATA

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Unique anonymised identifier.
Ticket Date	DateTime	2025-06-10 13:25:00	Date and time of support interaction.
Ticket Reason	Categorical	Account Support	Use existing reason codes.
Ticket Count	Integer	3	Number of support interactions.
Resolution Time	Numeric	18.5	Time to resolve ticket, preferably hours.
Resolution Status	Categorical	Resolved	Examples: Resolved, Open, Escalated.
Feedback Score	Numeric	4	Customer feedback score; specify scale.
Feedback Text	String	Unable to complete...	Optional; anonymise and supply separately if possible.

TABLE 8: MARKETING AND CUSTOMER ENGAGEMENT DATA

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Unique anonymised identifier.
Acquisition Channel	Categorical	Social Media	Channel through which customer was acquired.
Campaign ID	String	CAMP025	Identifier for marketing campaign.
Acquisition Cost	Numeric	180.00	Cost associated with acquiring the account, where available.
Email Sent	Integer	5	Number of marketing emails sent.
Email Opened	Integer	3	Number of marketing emails opened.
Email Clicked	Integer	2	Number of marketing emails clicked.
Nudge Received	Integer	4	Number of engagement nudges received.
Nudge Engagement	Integer	2	Number of nudges engaged with.
Campaign Date	Date	2025-04-01	Date associated with campaign or engagement.

TABLE 9: TARGET VARIABLE – DORMANCY

Column name	Data type	Example	Additional information
Customer ID	String	CUST001245	Unique anonymised identifier.
Observation Date	Date	2025-01-01	Date from which prediction period begins.
Last Activity Date	Date	2025-04-15	Most recent qualifying activity.
Dormancy Date	Date	2025-07-15	Date customer was classified as dormant, if applicable.
Dormant Within 6M	Boolean	True	Target: True if customer became dormant within six months; otherwise False.
Days to Dormancy	Integer	195	Days between observation date and dormancy date.
Current Activity Status	Categorical	Active	Status at end of observation period.

TABLE 10: DATA QUALITY AND METADATA REQUIREMENTS

Column name	Data type	Example	Additional information
Source System	Categorical	Mobile App	Identify originating system.
Record Date	DateTime	2025-04-15 10:00:00	Date/time record was generated.
Data Period	String	2025-Q1	Reporting or observation period.

Missing Flag	Boolean	False	Indicates whether original value was missing.
Record Status	Categorical	Valid	Examples: Valid, Corrected, Rejected.
